I. Introduction

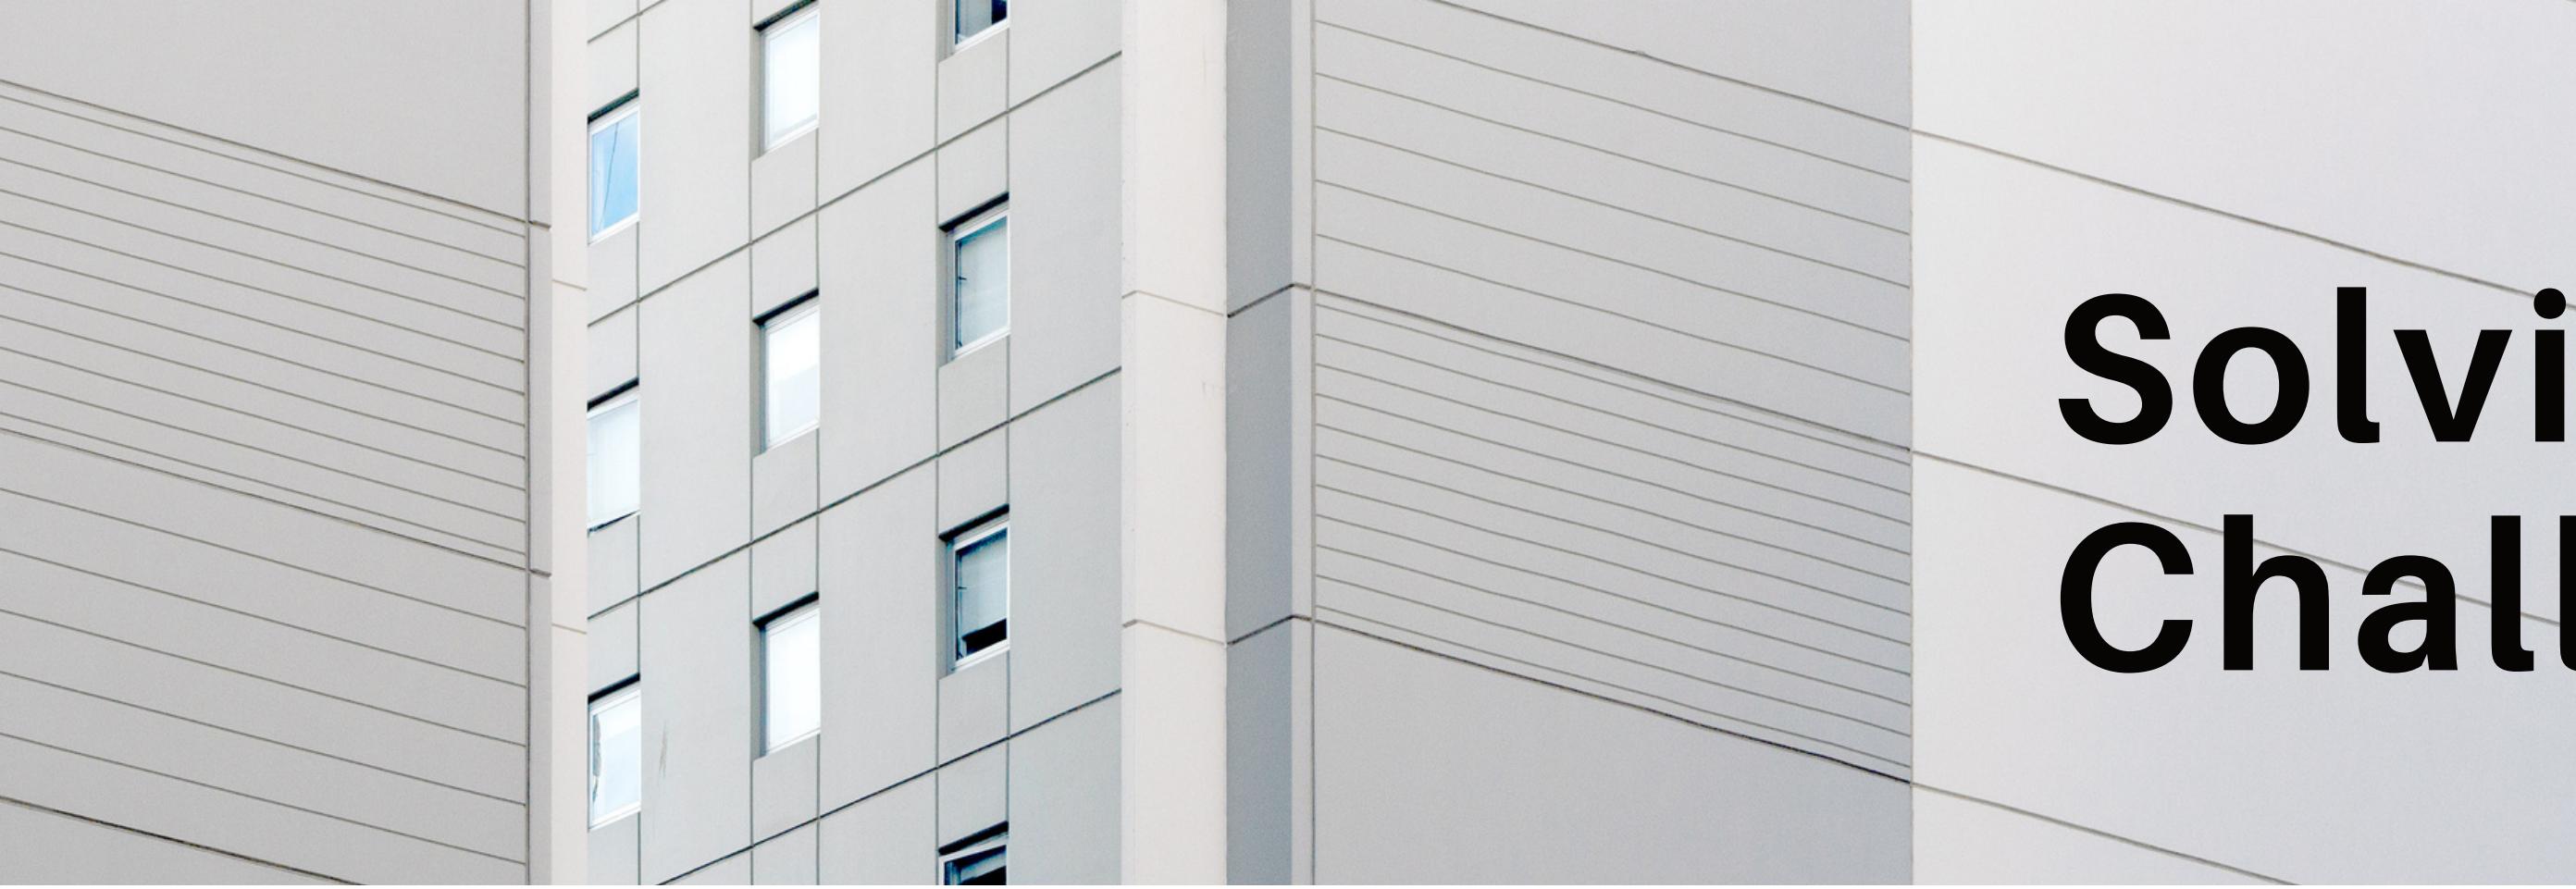

- MML was born to create an online platform to help students and lecturers connect more easily and enhance the learning experience.
- Teaching in a school environment with a large number of students and a tight schedule, leading to difficulties in meeting and interacting between students and lecturers.
- The goal is to create an easy-to-use interface, provide personal information for lecturers and students, and build an online environment to create connection and interaction between Surname.

II. Context

Nowadays, in the school training environment, the phrase "meet the lecturer" has become an important task, especially for groups of students participating in projects, internship classes, and internships. Other individual or small group subjects. However, arranging and managing meetings between students and lecturers can be difficult.

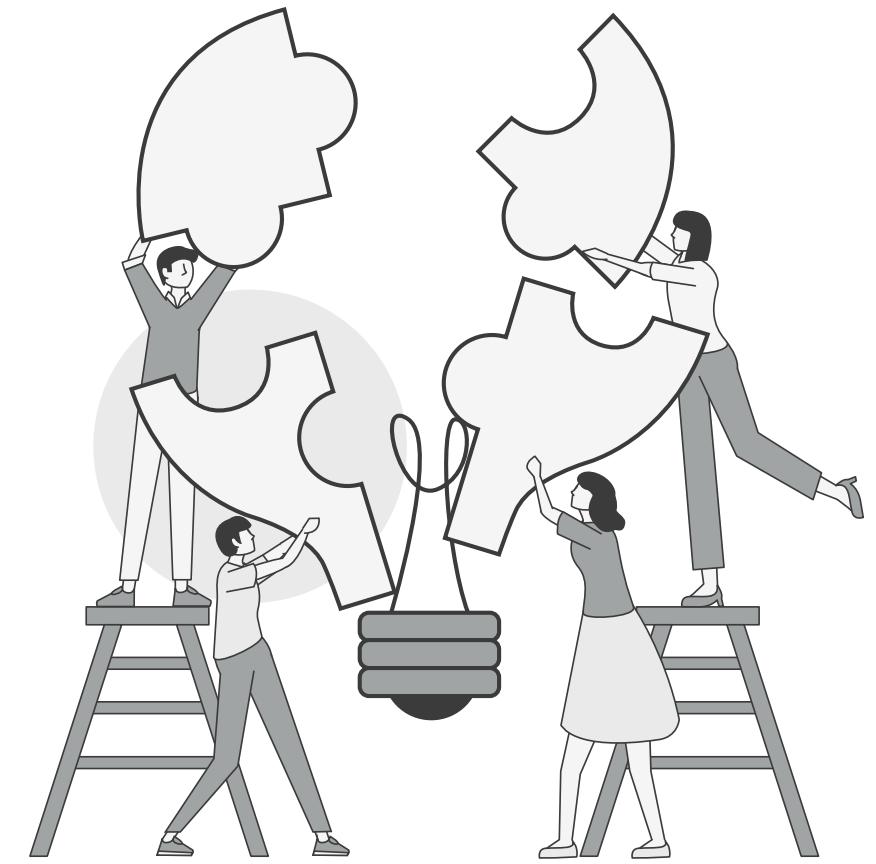

Solving Challenges

Difficulty in arranging meetings

Information Fragmentation

The need for interaction
and connection

II. Requirement

Login and Manage Account:

- Can log by email address @fpt.edu.vn.
- Can changing passwords and updating personal information.

Manage Meet Slot:

- Can create meeting with flexible time and date.
- Ability to divide Slots according to purpose.
- Ability to create private Slots or public

Manage Schedule:

- Students can search lecturer meeting schedules.
- There is a function to schedule a meeting with a lecturer by selecting an empty Slot.

Handling Meeting Requests:

- Instructors have the ability to view and manage meeting requests from students.
- Requests are assigned to available Slots in the instructor's schedule.
- Search for instructors by their major.

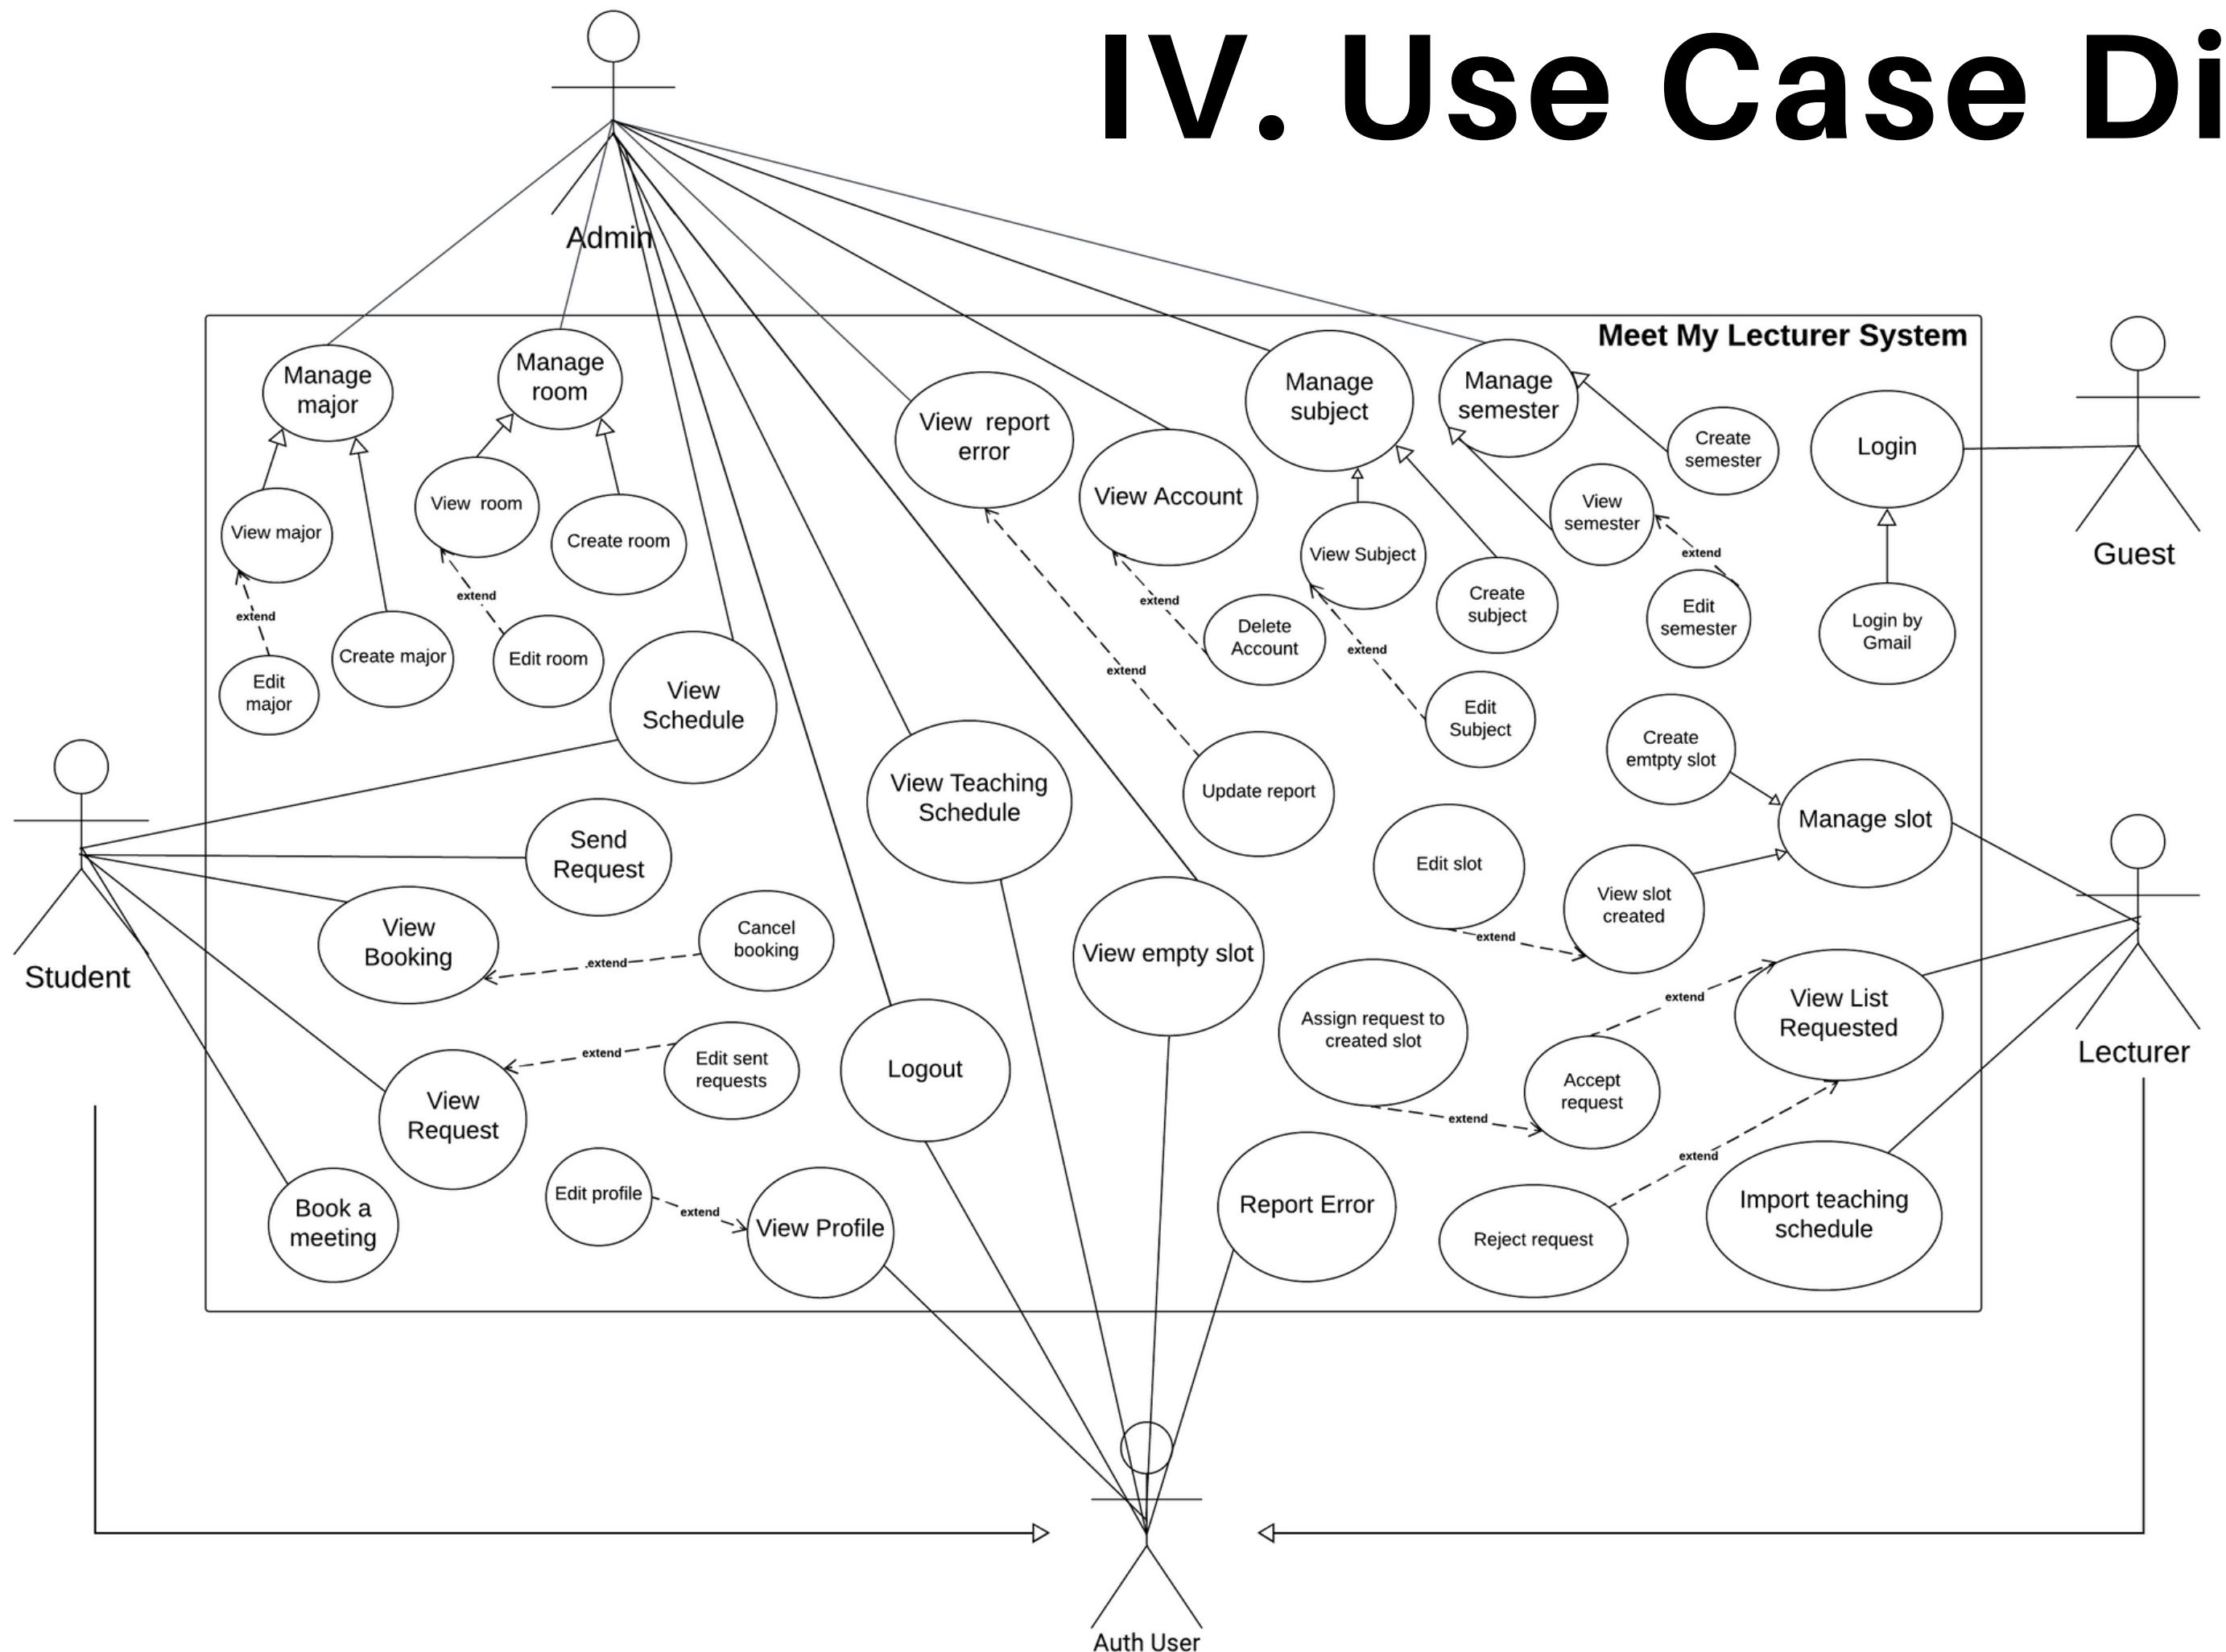

Import Teaching Schedule:

- Instructors can import teaching schedules and avoid duplicate schedules.

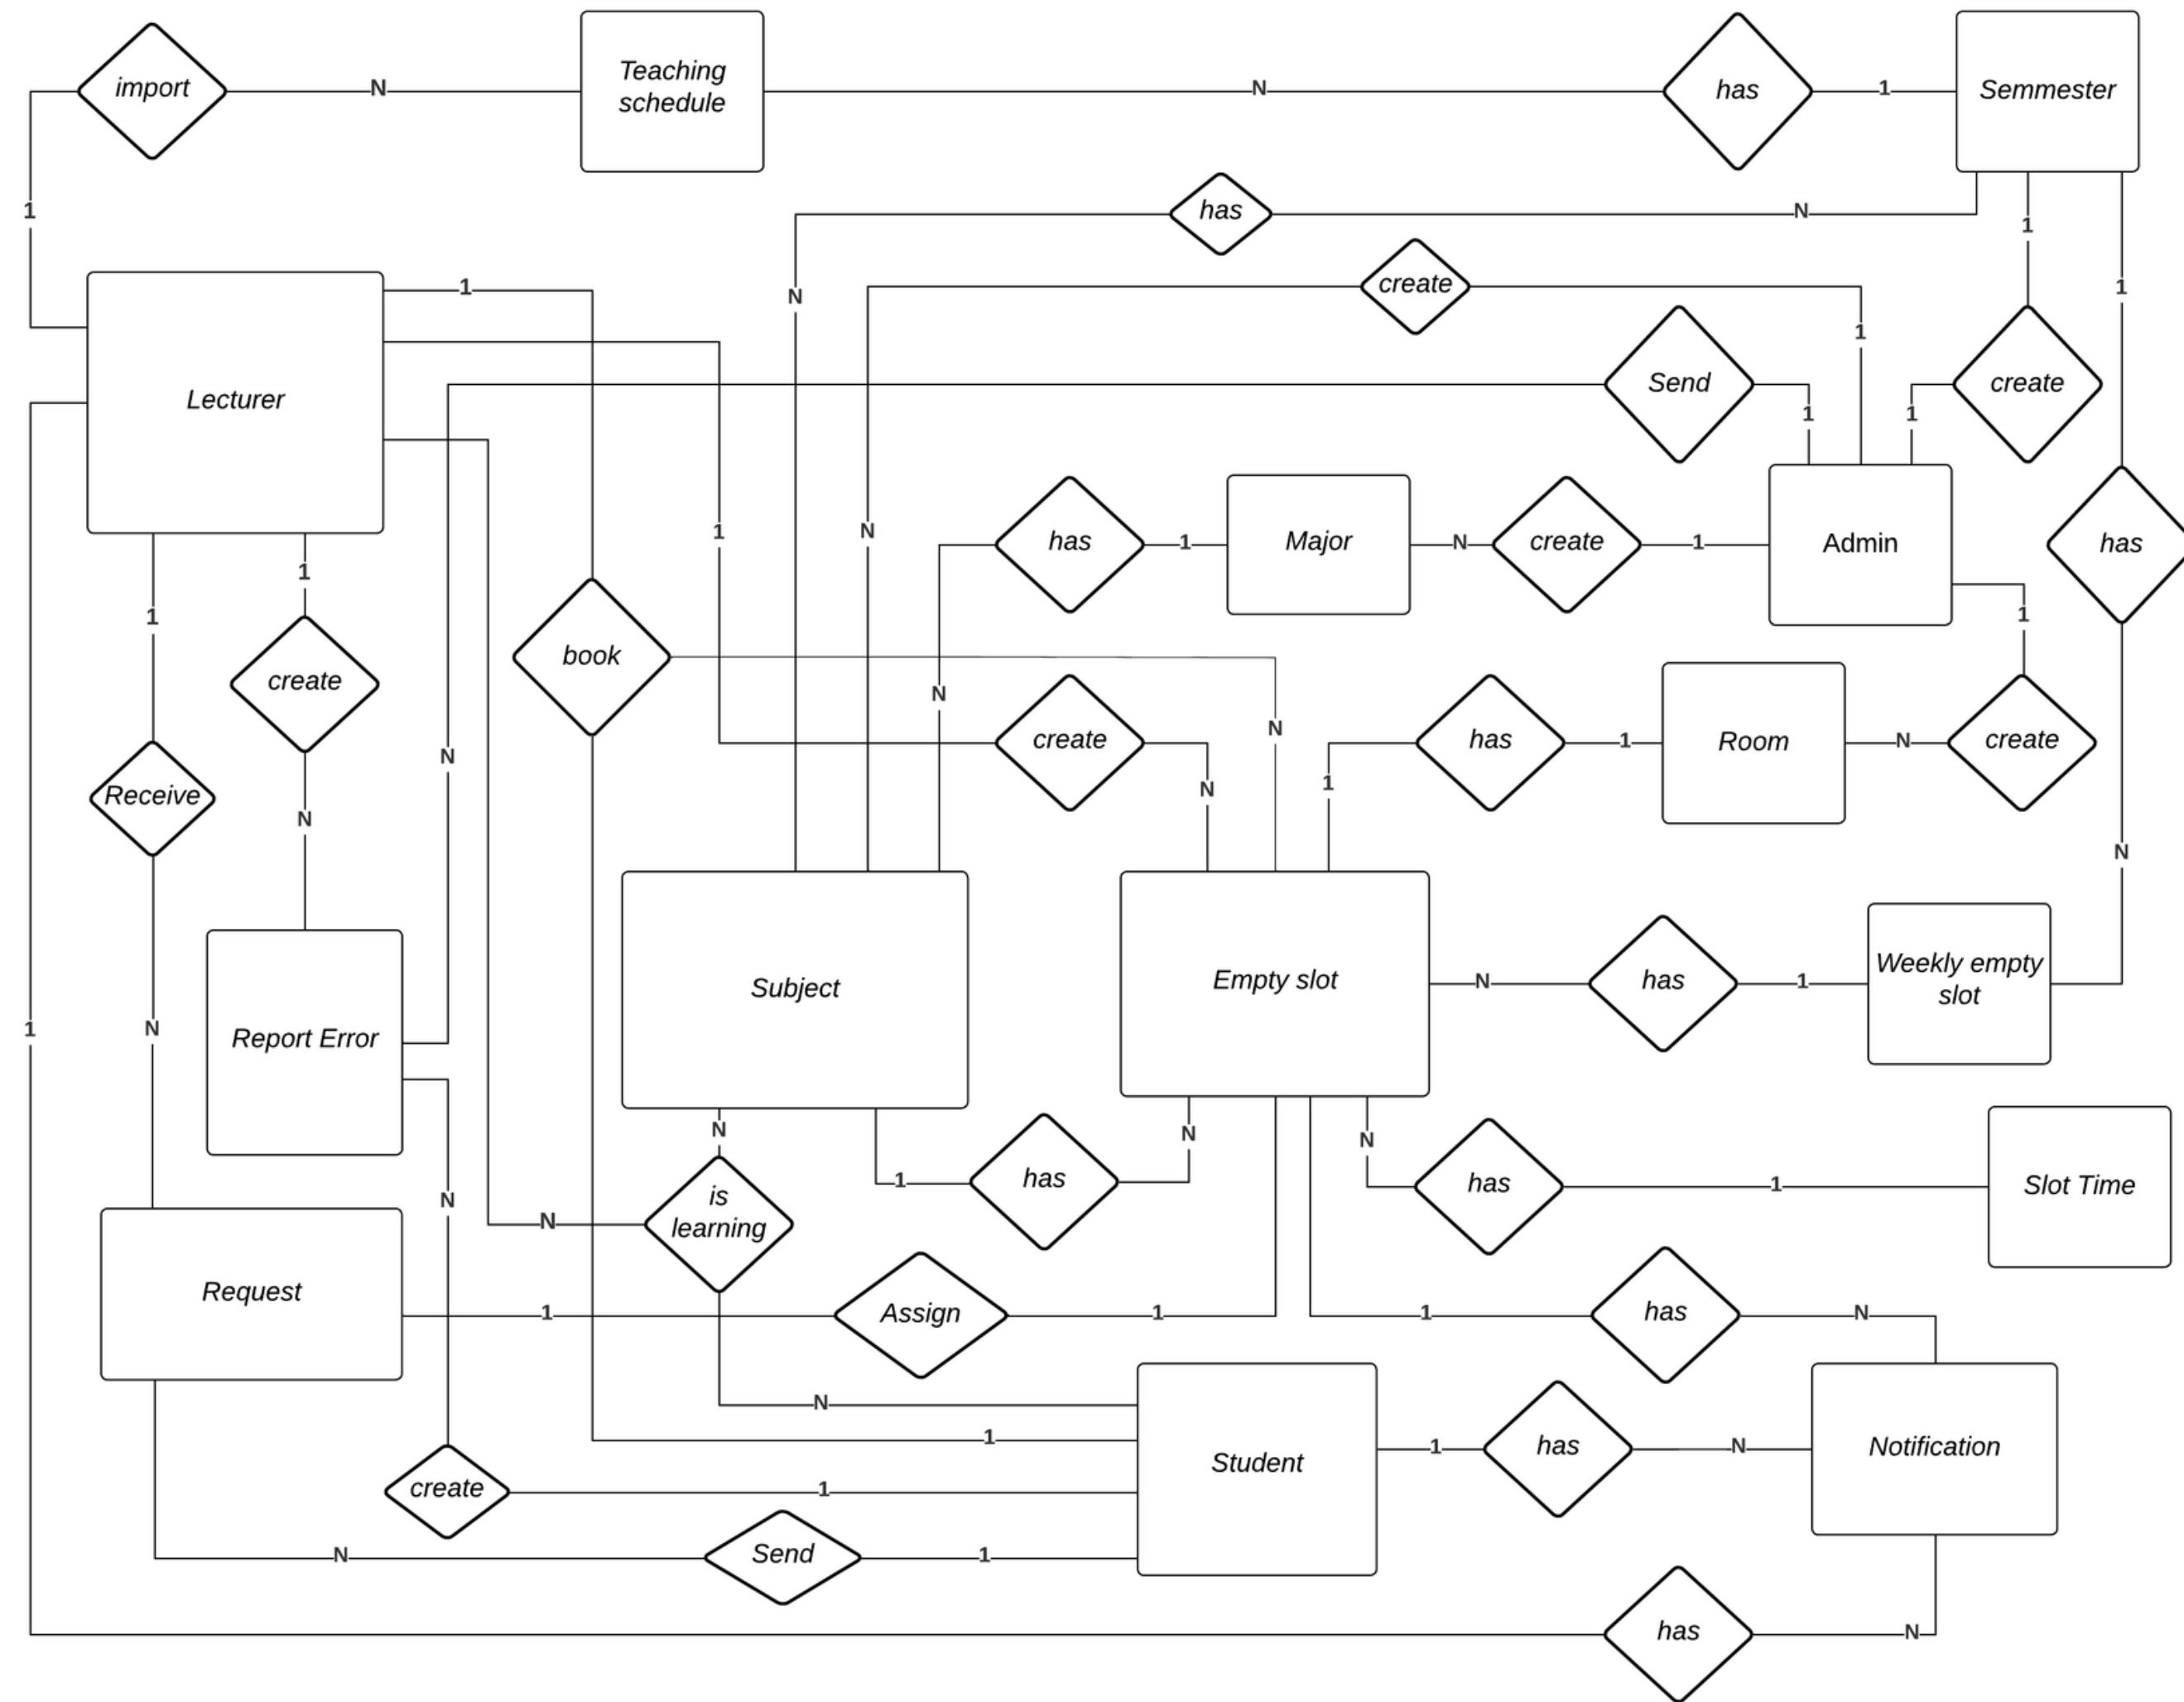

Managing Roles:

- The system must support three types of roles: Admin, Lecturer, Student.
- Admin has the right to manage all accounts and application functions.
